**ENERGY SOLUTIONS** *Sales, installations and engineering services of renewable energy solutions*

Aug 3<sup>rd</sup>, 2009  
Jerry Dutreuil  
Le Beau Jour  
Executive Director

Dear Donald,

In lieu of our conversations, this will serve as a "LETTER OF INTENT" with respect to Le Beau Jour's (LBJ) involvement in SHELTER2HOME's project in Haiti in providing affordable and decent accommodation to people dislodged by natural disaster or poverty. LBJ has been providing renewable energy solutions to our customers from residential, to refrigeration systems for clinics and consultations to other commercial businesses in Haiti since 1991. Our services also extends to engineering management of infrastructure constructions through a contracting sister company, Consortium d'Etudes et de Techniques Appliquées (CETA) since 1995.

Subject to all terms and conditions being satisfactory to all parties concerned, we would be thrilled to supply reliable, low watt Photovoltaic (PV) panels required to achieve the all inclusive homes. Your Shelters are innovative and can be adapted to Haiti's environment. At LBJ, we believe incorporating renewable source of energy such as solar panels can add value to the homes. We understand Haiti's project can easily attain one thousand (1000) shelters per year for duration of 10 years. LBJ is wholly devoted to SHELTER2HOME's success.

We look forward to aiding the project to life as effortlessly as possible.

Sincerely yours,

Jerry Dutreuil
