Donald Stevens
Shelter2Home
PO Box 3223
Winchester, VA 22604

Dear Mr. Stevens,

Thank you for contacting us about your SHELTER2HOME project in Haiti.

As you know, our sister company in Haiti, the Acierie d'Haiti, is the largest steel fabricator and distributor in the country of Haiti.

Confirming our conversations, we are prepared to supply your project in Haiti with the appropriate light steel sections as per your specifications sheet.

Our plant in Haiti will produce the sections from American raw material, which we intend to buy from a steel plant in Sharon, Pennsylvania. That plant will coat and pack the raw material for us, which we will buy and transport to Haiti, paying all necessary duties and taxes. We will then transform them in Haiti to the final products for your project on our tube mill in Port-au-Prince.

I trust this answers all of your questions. If not, please let me know and I will be happy to go into greater detail.

Sincerely,

Matthew J Greenberg
